Who We Are

Fravent Limited is a fully registered company with the Registrar of Companies (Registration Number: 80020003614101). We exist to help clients realise their goals in electrical engineering, solar and renewable energy, property management, consultancy and advisory services, import and export, logistics and transport, land brokerage, and business intelligence.

We employ experienced, exposed, and professional staff for every project we deliver. Our clients include private individuals, schools, private and public companies, organisations, local and international investors, and government ministries.

A steady flow of orders from Fravent's customers is an encouraging sign and a true reflection of their trust and confidence in our management's rich heritage and diversified experience. This recognition rests on Fravent's persistent track record in delivering successful projects year after year.

Focus

Electrical &
Solar Solutions

Base

Kampala,
Uganda

Promise

Quality,
Affordable, On-time

OUR MISSION

Fravent Limited exists to establish a strong and reliable working bond with its clients, delivering quality, affordable and up-to-standard services for all our stakeholders.

OUR VISION

Our company envisions evolving into the leading company providing unsurpassed services to its participants across the globe.

■ What Guides Us

Reliable

We deliver systems that last and support that clients can trust.

Efficient

We plan carefully, execute cleanly, and finish on time.

Sustainable

We build solar and electrical solutions that power a brighter tomorrow.

Client-first

We do not just install systems. We deliver lasting solutions.

■ Electrical Engineering & Renewable Energy

- General electrical works (domestic & industrial wiring)
- Power line construction
- Transformer installation
- Solar backup systems
- Mini-grid installation
- Grid-tied solar systems
- Solar water irrigation installation
- Renewable energy solutions
- Earthing works
- Facilities maintenance & engineering
- Power generators
- Air conditioners
- Solar PV systems
- Security cameras
- Low voltage systems
- LV and MV installations
- UPS systems & capacity batteries
- Switchgear, protection & control relays

Turnkey renewable energy delivery

From load assessment and system design to construction, installation, testing, commissioning and monitoring — we deliver solar power plants and solar mini-grids for both grid-tied and off-grid needs.

■ Property Management Services

Property Management

Day-to-day management that keeps properties productive and well maintained.

Property Sales Agency

Support for buying and selling with clear market guidance.

Tenant Search & Placement

Finding, screening, and placing the right tenants.

Preparing Property for Rental

Getting units ready for the market, including repair and maintenance.

Retrofitting & Consulting

Practical advice and upgrades that improve performance and value.

Site Inspections & Reporting

Regular inspections, reporting, and follow-up action.

Sub-contractor Supervision

Hiring and supervising trusted sub-contractors on site.

Compliance & Remittances

Submission of governmental remittances and related paperwork.

Tenant Administration

Up-to-date tenant lists, notices, leasing, and communication.

Power line construction

We serve the power-line and energy industry with pride and integrity. Our teams deliver projects ranging from 11kV to 33kV, with continuous training across a wide scope of construction work.

Substation development

For industrial, commercial, or residential power sub-stations, we assemble resources into a turnkey package — from ground-breaking to finished projects.

LV and MV installations

Design, supply and construction of LV and MV installations, mainline and non-mainline compact secondary sub-stations, switchgear, protection and control relays, transformer installations, capacity batteries and filters, and UPS systems.

Renewable energy

Load assessment, system design, construction, installation, testing, commissioning and monitoring of solar power plants and solar mini-grids — both grid-tied and off-grid.

UGAFODE Microfinance Limited — Nakivale Branch

Solar Hybrid System — OFF Grid

Completed project · Nakivale Refugee Settlement

Project Name:	Solar Hybrid System - OFF Grid
Client:	UGAFODE Microfinance Limited - MDI
Location:	Nakivale Refugee Settlement, Uganda
Status:	Completed
Scope:	Design and installation of an off-grid solar hybrid power system, including solar array works, hybrid inverter and battery storage, electrical panel integration, and commissioning for reliable branch operations.

■ **Field Installation — Nakivale**

Quality workmanship on site

Fravent technicians carried out solar array mounting, rooftop installation, and electrical panel integration with clear cable management, branded PPE, and a focus on safe, lasting systems for the UGAFODE Nakivale branch.

■ Commissioned Off-Grid Hybrid System

Hybrid Inverter

Deye hybrid inverter installed and commissioned for off-grid branch power.

Battery Storage

Wall-mounted lithium battery bank for reliable overnight and backup supply.

Clean Integration

Neat trunking, distribution boards, and isolators for safe operation.

Client Outcome

Stable power for UGAFODE Microfinance Limited - MDI at Nakivale.

PROMOTION OF MINI-GRID FOR RURAL ELECTRIFICATION (Pro Mini Grids)

Location:	Lamwo District - Uganda (Paloga, Potika, Pangira, Labayango, Lapidanyi, Pawena, Apwoyo, Apyetta Town Council & Apyeta West, Kapeta, Muddu, Agoro & Lollimebeng)
Duration:	Three (3) Months
Purpose:	Last Mile Connection / Home Connection / House wiring
Funders:	GIZ, REA, Government of Uganda
Contractor:	Sagemcom Limited
Client:	WINCH Energy

SHARED COMMUNITY SOLAR PROJECT — Pro Mini Grid

Location: Kalyamawolu Village, Kyabagamba Sub-county, Maddu Parish, Gomba District
Client: Ministry of Local Government
Status: Completed & Commissioned

MAZIMA COMMUNITY SOLAR SYSTEM

Location: Buwenge, Jinja District - Uganda
Client: Mazima Community Development Center
Status: Completed and Commissioned

Electrical Upgrade and Installation of Automatic Change Over System

Location: Uganda Museum · Client: Equatorial Power · Status: Complete

Residential Apartment Wiring

Location: Sentema Road, Mengo · Purpose: Domestic Wiring · Status: Complete

Maintenance of Lighting System

Location: Luthuli Avenue, Bugolobi · Client: Madam Ivy · Status: Complete

Ready for the next assignment

From community solar and mini-grids to museum upgrades and residential wiring —

Fravent Limited delivers practical electrical and solar solutions across Uganda.
