The Town Clerk
Makindye-Ssabagabo Municipal Council
Wakiso District, Uganda

Dear Sir/Madam,

RE: REQUEST TO PARTNER WITH MAKINDYE SSABAGABO DIVISION IN THE PROJECT, 'COMMUNITY IN MOTION: PROMOTING HEALTH THROUGH SPORTS

FairBanks Medical Centre Limited is pleased to introduce **Community in Motion – Promoting Health Through Sports**, a community-based health and wellness initiative that uses Sports as an entry point to bring practical healthcare, wellness and mental wellbeing services closer to communities.

The initiative is built around a simple proposition: Sports brings people together, and those gatherings can provide an opportunity to promote healthier lifestyles, identify health needs early, provide appropriate support and connect community members to continuing care.

The proposed outreach model brings together first aid and emergency response, Sports injury assessment, Sports massage and physiotherapy, hydration and nutrition education, triage and basic health screening, health education, wellness support, mental wellbeing awareness, referral and follow-up.

FairBanks Medical Centre intends to implement the initiative through accessible community settings such as Sports centres, playing fields, schools, churches and other suitable community spaces. The programme is designed to work collaboratively with local leaders, community structures, Sports organisations, coaches, health workers and other relevant stakeholders.

A key component is the FairBanks Community Health Intelligence Platform (FCHIP), which is intended to support digital registration, documentation, referral, follow-up and learning from community outreach activities. This enables the programme to move beyond a one-day outreach event towards a more continuous and measurable community-health pathway.

Request to Makindye-Ssabagabo Municipal Council

In view of the above, we respectfully request your approval and administrative support to introduce the Community in Motion initiative within Makindye-Ssabagabo Municipality. Specifically, we would appreciate the Council's support to:

- Grant approval for FairBanks Medical Centre to introduce and undertake the proposed community Sports and health activities within the Municipality.
- Guide us on appropriate communities, Sports facilities, schools, community spaces and other potential venues where the initiative may be introduced.
- Facilitate engagement with relevant local leadership, community structures and stakeholders.
- Support community mobilisation and awareness where appropriate.
- Advise on any municipal requirements, procedures or permissions that should be fulfilled before implementation.

We wish to emphasise that the initiative is intended to be implemented in partnership with existing community structures, with respect for the leadership, priorities and procedures of Makindye-Ssabagabo Municipal Council.

The proposed first phase is designed to be practical, measurable and evidence-driven, allowing the programme to learn from community response and progressively strengthen its model before wider expansion.

We would therefore be grateful for an opportunity to meet with you or a designated officer to formally introduce the initiative, present the concept and discuss how it can best complement the Municipality's community development and health priorities.

We have attached the Community in Motion concept presentation for your consideration and look forward to your guidance and to the possibility of working collaboratively with Makindye-Ssabagabo Municipal Council to promote healthier, more active and resilient communities through Sports.

Yours faithfully,

Racheal Nabukeera Sekagiri
