

WASSWA WILSON

Biomedical Engineer

7+ years in biomedical equipment work

wasswawilson0001@gmail.com · +256783230321

Kampala, Uganda | Ready for Kigali

English (fluent) · Luganda (native)

PROFILE

I am a biomedical engineer with over 7 years installing, commissioning, maintaining, and training users on hospital equipment. Most of that time was inside busy hospitals in Uganda. Since early 2025 I have also worked on personal contracts, including lab, theatre, and radiology installs at hospitals in the Democratic Republic of Congo - one of them serves the Kibali Gold Mine. I am used to travelling for service jobs, working on my own on site, writing clear service notes, and teaching clinical staff how to use and care for the machines. I want to bring that field experience to Medequip's clients across Rwanda and the region.

SKILLS FOR THIS JOB

What I do on site: Install, calibrate, commission, prevent faults, fix breakdowns, and hand over equipment ready for clinical use

Equipment I know well: Radiology (X-ray, CT, ultrasound, C-arm); theatre and ICU (ventilators, monitors, infusion pumps, theatre systems); lab analysers and support plant (blood bank, RO water, oxygen)

Client support: User training, procurement and commissioning support, service reports, maintenance logs, accreditation paperwork

How I work: Clear spoken English, independent field work, cross-border travel, quick learner on new brands and models

WORK EXPERIENCE

Independent Biomedical Engineer (personal contracts) | *Mar 2025 - Present*

- Install and maintain medical equipment for hospitals on a personal-contract basis after leaving GFF.
- Completed lab, theatre, and radiology installations at several hospitals in the Democratic Republic of Congo, including the hospital that serves the Kibali Gold Mine.
- Handle preventive and corrective maintenance, on-site troubleshooting, and basic user training after handover.
- Work independently on travel assignments and report back clearly to the client after each job.

Biomedical Programs Manager, Gould Family Foundation (GFF) | *Aug 2024 - Feb 2025*

- Ran biomedical programmes across several health facilities.
- Supported buying, installing, and commissioning medical equipment.
- Trained engineers and technicians, and kept work in line with healthcare technology standards.

Biomedical Manager, International Hospital Kampala (IHK) | *Jan 2020 - Jan 2024*

- Looked after biomedical engineering for a major private hospital for four years.
- Led installs and commissioning of CT scanners, oxygen plants, X-ray systems, and ICU equipment.
- Set up preventive maintenance so machines stayed up and safe for patients.
- Helped with procurement, lifecycle planning, service records, and COHSASA accreditation work.
- Trained clinical and technical staff on correct use and care.

Biomedical Engineer, Norvik Hospital Ltd | *Apr 2019 - Jan 2020*

- Serviced diagnostic and monitoring equipment day to day.
- Helped with installation and calibration of imaging and ICU devices.
- Supported the hospital's preventive maintenance routines.

EARLIER ROLES

Research Intern, Uganda Virus Research Institute | *Dec 2018 - Apr 2019*

- Helped with biomedical research and lab data work.

Teaching Assistant, Makerere University, College of Health Sciences | *Mar 2016 - Aug 2017*

- Supported biomedical engineering classes and lab sessions.

SELECTED HIGHLIGHTS

- 7+ years of hands-on hospital biomedical work across Uganda and Congo.
- Installed lab, theatre, and radiology equipment for hospitals in Congo, including the facility serving Kibali Gold Mine.
- Commissioned critical systems in Uganda such as CT, X-ray, oxygen plant, and ICU technologies.
- Helped IHK through COHSASA accreditation on the biomedical side.
- Trained engineers, technicians, and clinical users so equipment stays useful after install day.

EQUIPMENT EXPERIENCE

Radiology / imaging: CT, X-ray, ultrasound, C-arm

Theatre and ICU: Theatre systems, ventilators, monitors, infusion pumps

Laboratory: Haematology and chemistry analysers, blood bank systems

Support plant: Oxygen plants, RO water systems

Maternity / neonatal: Incubators, phototherapy, foetal Dopplers, CTG

EDUCATION AND ACADEMIC LEVELS

Bachelor's degree (undergraduate)

Makerere University

BSc Biomedical Engineering, Second Upper Honours (Class II Division I), 2012-2017

Professional certificate (postgraduate short course)

University of Washington

Certificate in Leadership and Management in Health, 2022 - Grade: A+

Advanced professional certificate

Green Bridge School of Open Technology

Advanced Java Programming, 2016 - Grade: A+
