Who We Are

Fravent Limited is a fully registered company with the Registrar of Companies (Registration Number: 80020003614101). We help clients realise goals in electrical engineering, solar and renewable energy, property management, consultancy and advisory, import and export, logistics and transport, land brokerage, and business intelligence.

We employ experienced, exposed, and professional staff for every project. Our clientele includes private individuals, schools, private and public companies, organisations, local and international investors, and government ministries.

A steady flow of orders is an encouraging sign of trust in Fravent management's rich heritage and diversified experience, built on successful delivery year after year.

Private, Public & NGO

Delivery

Design to Commissioning

Ground array works — Nakivale.

UGAFODE Nakivale branch site.

Team on site — Kiwoko Hospital.

Commissioned hybrid inverter system.

OUR MISSION

Establish a strong and reliable working bond with clients, delivering quality, affordable and up-to-standard services for all stakeholders.

OUR VISION

Evolve into the leading company providing unsurpassed services to participants across the globe.

What Guides Us

Reliable

We deliver systems that last and support clients can trust.

Efficient

We plan carefully, execute cleanly, and finish on time.

Sustainable

We build solar and electrical solutions for a brighter tomorrow.

Client-first

We do not just install systems — we deliver lasting solutions.

Safe

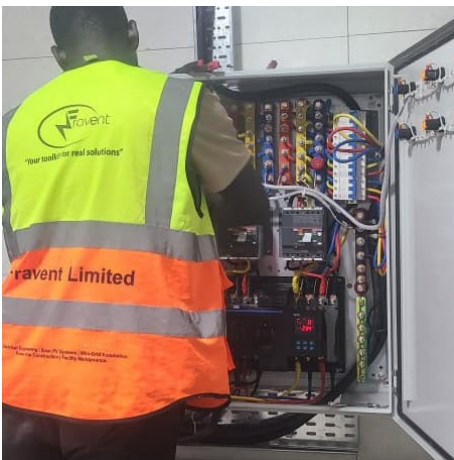

Site discipline, PPE, and careful commissioning on every job.

Smart

Practical engineering choices matched to real client needs.

Electrical Engineering & Renewable Energy

- General electrical works (domestic & industrial wiring)
- Power line construction
- Transformer installation
- Solar backup systems
- Mini-grid installation
- Grid-tied solar systems
- Solar water irrigation installation
- Renewable energy solutions
- Earthing works
- Solar hybrid systems (off-grid & hybrid)
- Facilities maintenance & engineering
- Power generators
- Air conditioners
- Solar PV systems
- Security cameras
- Low voltage systems
- LV and MV installations
- UPS systems & capacity batteries
- Switchgear, protection & control relays
- Testing, commissioning & handover

Turnkey renewable energy delivery

From load assessment and system design to construction, installation, testing, commissioning and monitoring — solar plants and mini-grids for grid-tied and off-grid needs.

Electrical panel integration.

Rooftop solar mounting.

Completed hybrid inverter bank.

Changeover & protection panels.

Larger hybrid storage rooms.

Ground-mounted solar arrays.

Property Management Services

Property Management

Day-to-day management that keeps properties productive and well maintained.

Property Sales Agency

Support for buying and selling with clear market guidance.

Tenant Search & Placement

Finding, screening, and placing the right tenants.

Preparing Property for Rental

Getting units ready for the market, including repair and maintenance.

Retrofitting & Consulting

Practical advice and upgrades that improve performance and value.

Site Inspections & Reporting

Regular inspections, reporting, and follow-up action.

Sub-contractor Supervision

Hiring and supervising trusted sub-contractors on site.

Compliance & Remittances

Submission of governmental remittances and related paperwork.

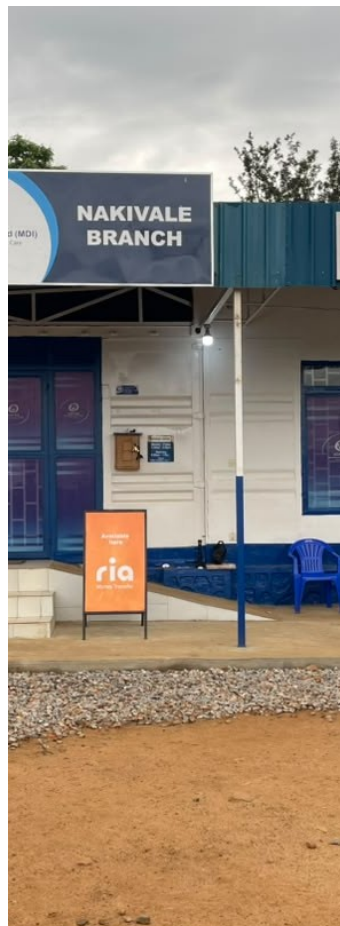

Tenant Administration

Up-to-date tenant lists, notices, leasing, and communication.

Electrical excellence · Property care · Lasting client partnerships

Site readiness and maintenance teams.

Managed facility environments.

Client spaces powered and maintained.

Technical support beyond the office.

Power line construction

We serve the power-line and energy industry with pride and integrity. Our teams deliver projects ranging from 11kV to 33kV, with continuous training across a wide scope of construction work.

Substation development

For industrial, commercial, or residential power sub-stations, we assemble resources into a turnkey package — from ground-breaking to finished projects.

LV and MV installations

Design, supply and construction of LV and MV installations, compact secondary sub-stations, switchgear, protection and control relays, transformers, batteries, filters, and UPS systems.

Renewable energy

Load assessment, system design, construction, installation, testing, commissioning and monitoring of solar power plants and solar mini-grids — both grid-tied and off-grid.

Solar Hybrid System — OFF Grid

Completed and Commissioned

Description: Procurement, Delivery, Installation, Testing and Commissioning of a Solar Hybrid System.

Client: UGAFODE Microfinance Limited - MDI

Location: Nakivale Refugee Settlement - Isingiro District, Western Uganda

System Size: 5.58 kWh

Status: Completed and Commissioned

Scope: Solar array, hybrid inverter, battery storage, electrical panels, testing

UGAFODE Microfinance Limited (MDI) Nakivale Branch — project site.

UGAFODE Nakivale Branch directional signage.

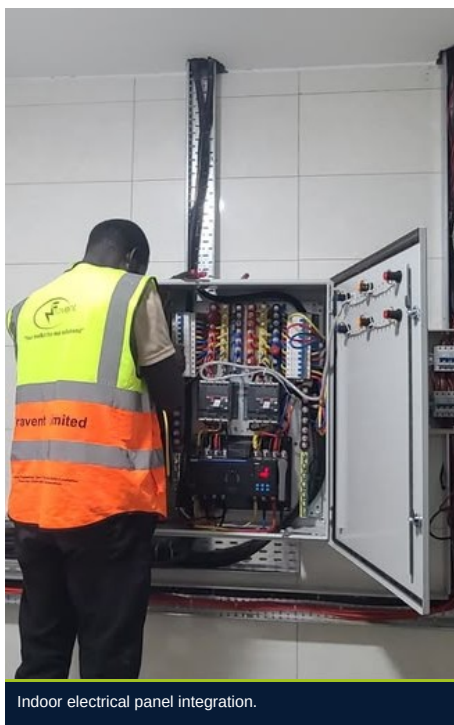

Ground-mounted solar array installation.

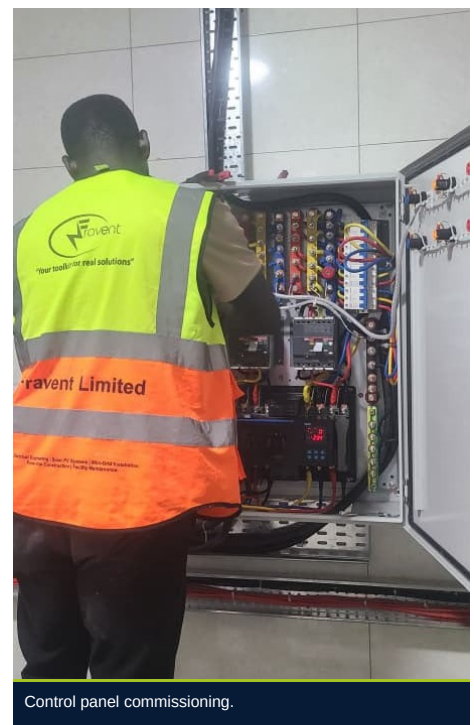

Rooftop solar panel mounting.

Fravent technician on array works.

Indoor electrical panel integration.

Control panel commissioning.

Field Installation — Nakivale (5.58 kWh)

Quality workmanship on site

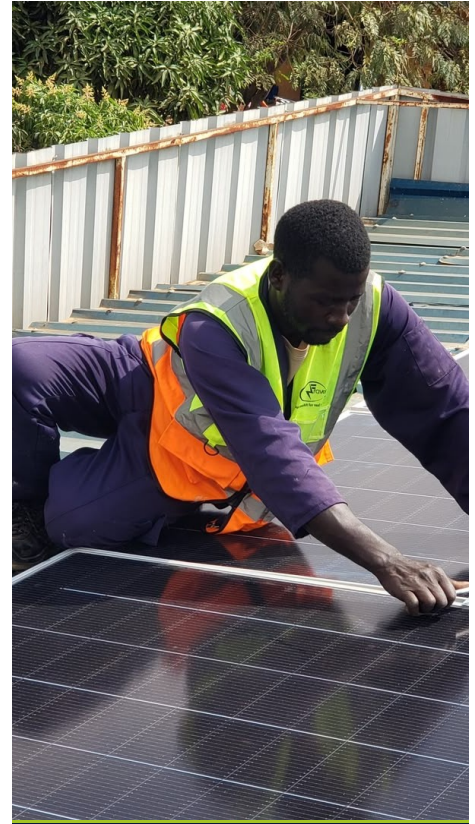

Solar array mounting, rooftop installation, electrical panel integration, and commissioning for reliable UGAFODE Nakivale branch operations.

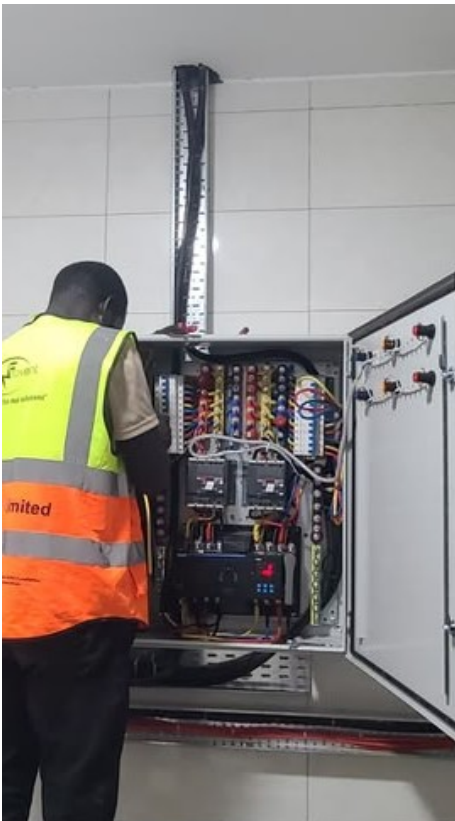

Technician securing ground-array mounts.

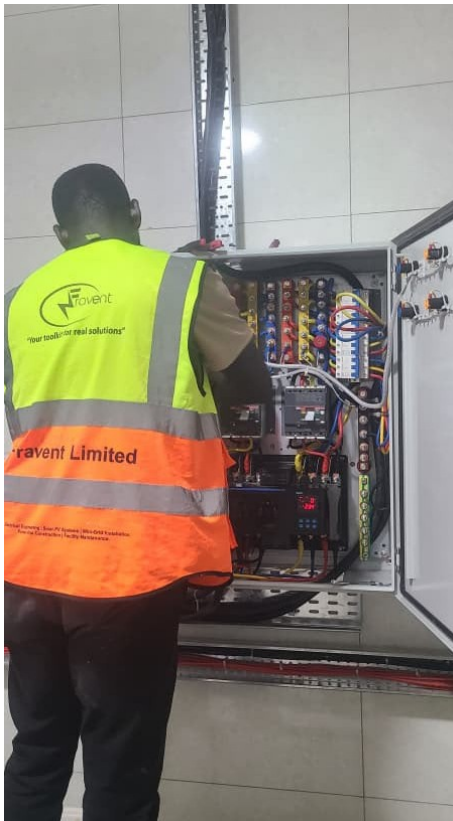

Branded PPE during array works.

Rooftop panel fastening.

Electrical panel integration.

Control panel wiring.

Transfer switch installation.

Commissioned Off-Grid Hybrid System — 5.58 kWh

Hybrid Inverter

Deye hybrid inverter commissioned for off-grid branch power.

Battery Storage

5.58 kWh lithium storage for overnight and backup supply.

Clean Integration

Neat trunking, distribution boards, and isolators.

Client Outcome

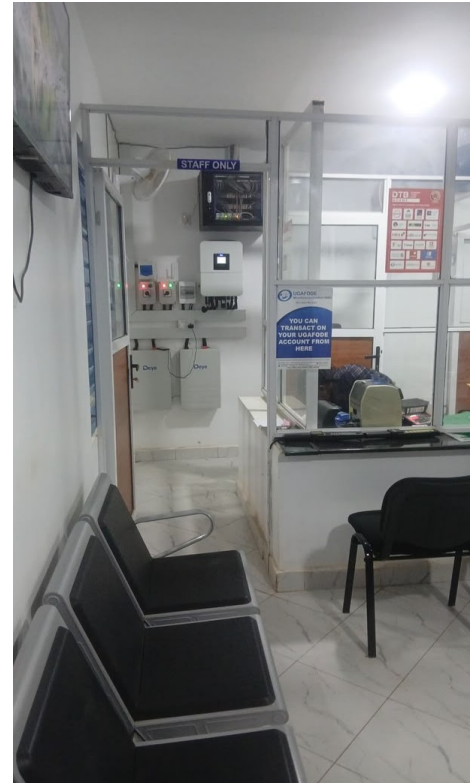

Stable power for UGAFODE MDI at Nakivale.

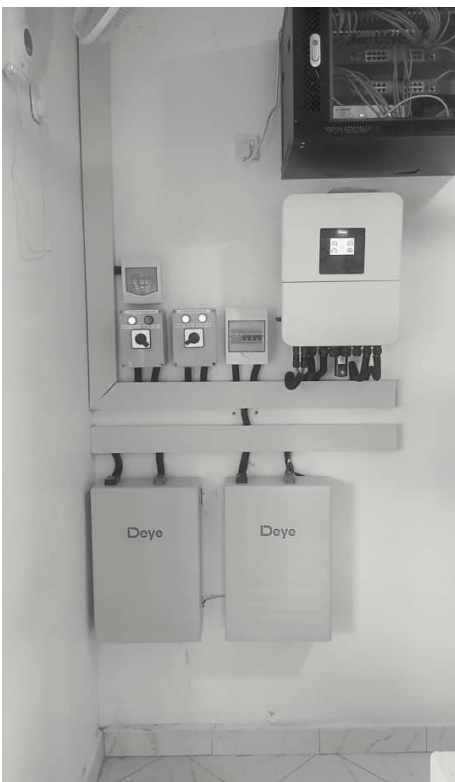

Completed Deye hybrid inverter and batteries.

Commissioned wall-mounted system.

System view from customer area.

Clean completed wall installation.

Mains / generator / inverter changeover.

Powered UGAFODE Nakivale Branch.

Completed Solar Hybrid Systems — UGAFODE Microfinance Limited (MDI)

Rushere — Western Uganda

Size: 6.0 kWh

Status: Completed and Commissioned

Procurement, Delivery, Installation, Testing and Commissioning of a Solar Hybrid System.

Ntungamo — Western Uganda

Size: 6.0 kWh

Status: Completed and Commissioned

Procurement, Delivery, Installation, Testing and Commissioning of a Solar Hybrid System.

Kyaka Sales Branch

Size: 5.0 kWp DC

Status: Completed

Procurement, Delivery, Installation, Testing and Commissioning of a Hybrid Solar System.

Rwamwanja Sales Branch

Size: 6.25 kWp DC

Status: Completed

Procurement, Delivery, Installation, Testing and Commissioning of a Hybrid Solar System.

Nakivale — Isingiro District

Size: 5.58 kWh

Status: Completed and Commissioned

Off-grid solar hybrid system for the Nakivale Refugee Settlement branch.

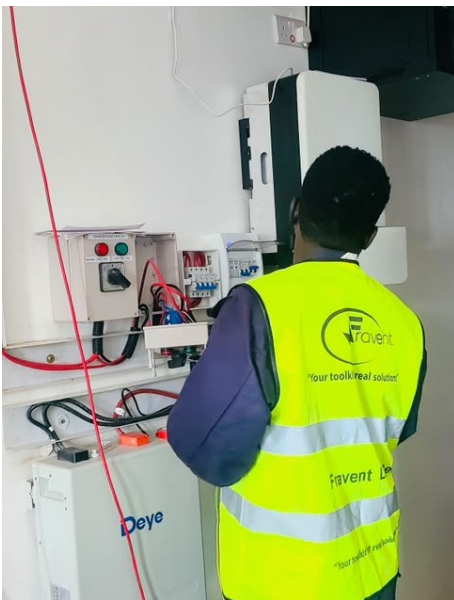

Programme focus

Size: Multi-site

Status: Active client account

Repeat UGAFODE branch deployments across Western Uganda and settlement markets.

Branch installation gallery

Transfer switch and Deye battery works.

Completed Deye hybrid wall mount.

Manual changeover controls.

Completed system in branch interior.

Commissioned inverter and batteries.

UGAFODE Nakivale branch identity.

Solar Hybrid System — Kiwoko Hospital

Description:	Procurement, Delivery, Installation, Testing and Commissioning of a Solar Hybrid System.
Location:	Kiwoko Hospital - Nakaseke District
System Size:	10 kWh
Client:	Adara Group
Status:	On-going

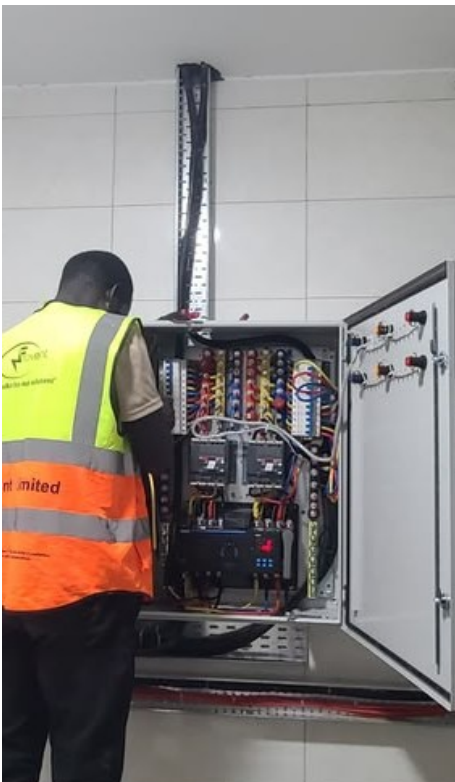

Fravent team on site at Adara Development Uganda — Kiwoko.

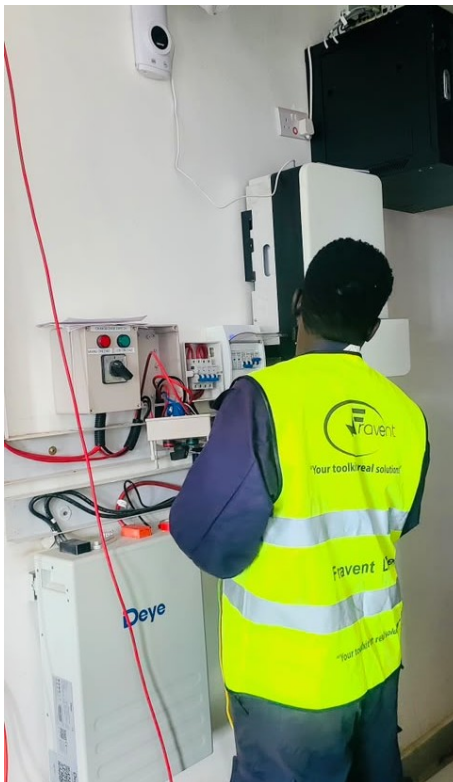

Jinko hybrid inverters and battery racks.

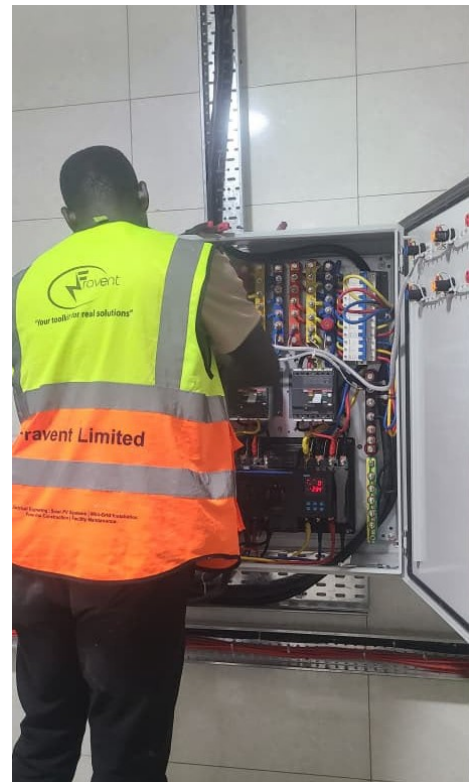

Commissioning checks on the 10 kWh system.

Comparable panel integration standards.

Transfer and protection practices.

Detailed commissioning discipline.

PROMOTION OF MINI-GRID FOR RURAL ELECTRIFICATION (Pro Mini Grids)

Location:	Lamwo District - Uganda (Paloga, Potika, Pangira, Labayango, Lapidanyi, Pawena, Apwoyo, Apyetta Town Council & Apyeta West, Kapeta, Muddu, Agoro & Lollimebeng)
Duration:	Three (3) Months
Purpose:	Last Mile Connection / Home Connection / House wiring
Funders:	GIZ, REA, Government of Uganda
Contractor:	Sagemcom Limited
Client:	WINCH Energy

Pro Mini Grids field works — Lamwo District (1/4).

Pro Mini Grids field works — Lamwo District (2/4).

Pro Mini Grids field works — Lamwo District (3/4).

Pro Mini Grids field works — Lamwo District (4/4).

SHARED COMMUNITY SOLAR PROJECT - Pro Mini Grid

Location: Kalyamawolu Village, Kyabagamba Sub-county, Maddu Parish, Gomba District

Client: Ministry of Local Government

Status: Completed & Commissioned

Shared community solar project — Gomba District (1/4).

Shared community solar project — Gomba District (2/4).

Shared community solar project — Gomba District (3/4).

Shared community solar project — Gomba District (4/4).

MAZIMA COMMUNITY SOLAR SYSTEM

Location: Buwenge, Jinja District - Uganda
Client: Mazima Community Development Center
Status: Completed and Commissioned

Mazima Community Solar System — Jinja District (1/4).

Mazima Community Solar System — Jinja District (2/4).

Mazima Community Solar System — Jinja District (3/4).

Mazima Community Solar System — Jinja District (4/4).

Hybrid Solar System — Ernest Cook University

Location: Balintuma Road, Mengo · Client: Ernest Cook University · Status: Completed

Procurement, Delivery, Installation, Testing and Commissioning of a Hybrid Solar System.

Electrical Upgrade and Installation of Automatic Change Over System

Location: Uganda Museum · Client: Equatorial Power · Status: Complete

Upgrade works and automatic change-over installation for reliable facility power.

Residential Apartment Wiring

Location: Sentema Road, Mengo · Purpose: Domestic Wiring · Status: Complete

Full domestic wiring package for a residential apartment development.

Maintenance of Lighting System

Location: Luthuli Avenue, Bugolobi · Client: Madam Ivy · Status: Complete

Lighting system maintenance and service support for a private client.

Ready for the next assignment

From UGAFODE hybrids and hospital systems to mini-grids and facility upgrades across Uganda.

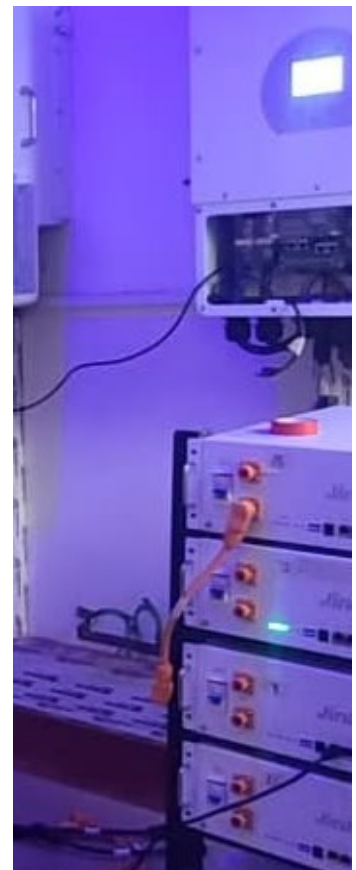

Power-line and upgrade capability.

Last-mile connection experience.

Hybrid systems ready for clients.

Larger facility-scale installs.
