

FairBanks x Jay Shetty Ecosystem

From inspiration to measurable community health outcomes

Your health, our mission.

Community Reach under the canopy

FairBanks Medical Centre entrance

Organisation	FairBanks Medical Centre & Pharmacy
Location	Kampala, Uganda
Contact	Racheal Nabukeera Sekagiri, Managing Director
Ask type	Strategic partnership / discovery call (10 minutes)

This brief invites the Jay Shetty ecosystem to explore a strategic collaboration with FairBanks - a Ugandan community health enterprise combining compassionate care, Community Reach, and FCHIP community health intelligence.

1. Building the future of community health

Medical Centre - clinical anchor in Kampala

Pharmacy - medicines beside the clinic

FairBanks is a community health social enterprise dedicated to transforming family and community health through accessible primary care, preventive medicine, community outreach, and technology-driven innovation. We believe quality healthcare should not depend on geography or income.

Our medical centre is the real-world laboratory where clinical care, Community Reach, and digital innovation come together - so solutions are designed, tested, and refined with real families before wider deployment.

Three complementary pillars

FairBanks Medical Centre & Pharmacy

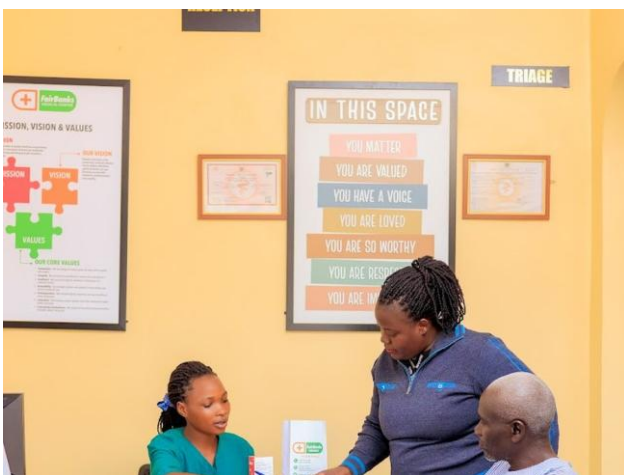

Quality family and community primary healthcare, diagnostics, pharmacy, and referrals.

FairBanks Community Reach

Outreach, health education, screening, maternal and child health, Gericare, school health, CHIS, and livelihoods.

FCHIP (Community Health Intelligence Platform)

AI-enabled intelligence that fuses community, facility, GIS, and climate signals to support earlier, smarter action.

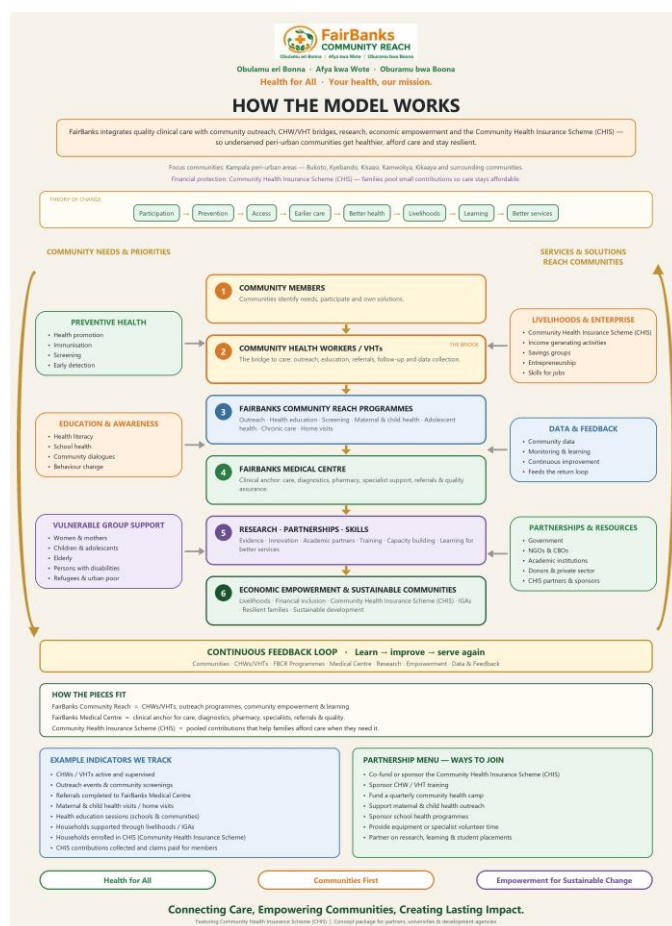

Reception and triage with dignity

Gericare - support for older patients

2. How FairBanks works - Community Reach

FairBanks operates a six-step cascade with a continuous feedback loop. FCHIP sits on the Data & Feedback layer - the digital nervous system that helps the model learn and improve.

Community Reach cascade - communities, CHWs/VHTs, programmes, medical centre, research, empowerment

- Community members identify needs and own solutions
- CHWs / VHTs bridge homes, schools, and care
- Community Reach programmes deliver education, screening, and home visits
- FairBanks Medical Centre anchors clinical care and quality
- Research, partnerships, and skills strengthen evidence and capacity
- Economic empowerment (including CHIS and IGAs) supports resilient families

Listening at a community outreach session

Community Reach gathering in full

3. The gap - and the FCHIP answer

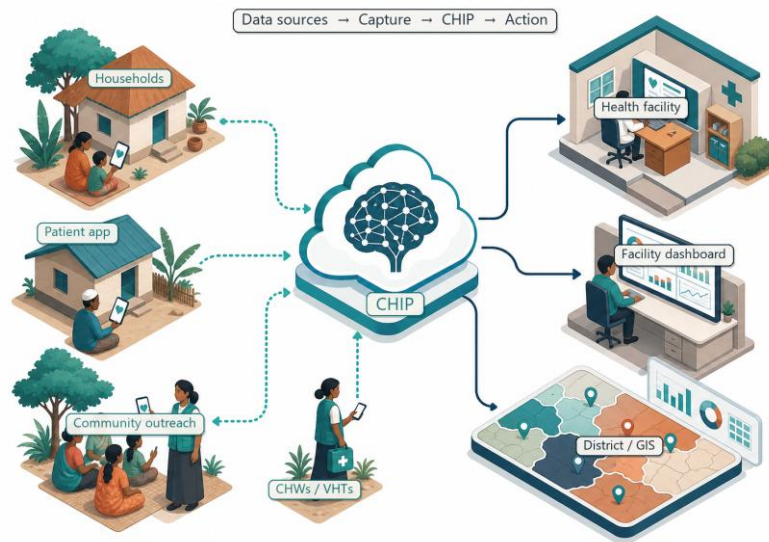

Blood-pressure screening in the community

Medical camp care beyond clinic walls

Primary healthcare in underserved communities is still largely reactive. Facilities often see people only after illness appears. Data from CHWs, schools, outreach, clinics, and pharmacies stays fragmented. Climate signals rarely join the picture. Clinical records often remain locked inside facility EMR/HMS systems - so the continuous feedback loop cannot learn fast enough to prevent outbreaks, maternal complications, or stock-outs.

FCHIP is FairBanks' deep-technology component. It connects community members, CHWs/VHTs, schools, communities, hospitals, and clinics; safely exposes data APIs to existing EMR/HMS systems for real-time clinical ingest; and fuses signals with GIS mapping and climate APIs to surface explainable early warnings and dashboards.

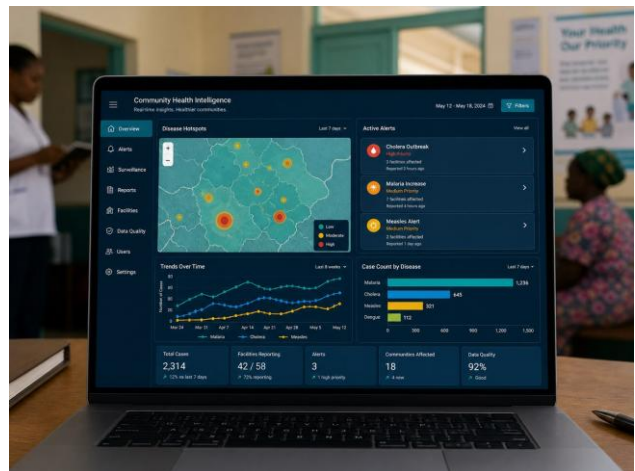

FCHIP flow: community and facility capture - intelligence - action for facilities and districts

Deep technology core

- Artificial intelligence and machine learning for risk scoring and early warning
- GIS mapping of disease and resource geography
- Climate API integration for climate-sensitive health risk
- Secure EMR/HMS data APIs (no rip-and-replace for clinics)
- Offline-capable mobile capture for CHWs/VHTs
- Cloud sync and analytics dashboards for facilities and partners

Mobile tools for CHWs and VHTs

Dashboards for timely decisions

4. Traction and innovation roadmap

Community health education in progress

Maternal and family health support

What is already live

- Operational FairBanks Medical Centre & Pharmacy in Kampala
- Active Community Reach across Bukoto, Kyebando, Kisaasi, Kamwokya, Kikaaya, and surrounding communities
- CHW/VHT engagement, maternal and child health, Gericare, chronic-disease screening, school and corporate health
- CHIS and livelihood pathways linked to affordable access
- Working FCHIP MVP ready for structured field validation and evidence building

Listening before treating

Point-of-care testing close to patients

Innovation roadmap

Stage	Status
Community healthcare model established	Completed
FairBanks Medical Centre operational	Completed
Community Reach platform operational	Completed

FCHIP working MVP	Completed - validating
Structured pilot evidence & partner onboarding	Next phase
District and regional expansion	Future vision

Long-term ambition: build one of Africa's leading community health intelligence ecosystems - combining primary care delivery with intelligent digital technologies that empower communities, providers, and partners.

5. Partnership opportunity

Compassion in the consulting room

Mothers and families in the clinic

Jay Shetty inspires millions to live healthier, more purposeful lives through compassion, mindfulness, and service. FairBanks converts that inspiration into measurable community health outcomes - care close to home, earlier prevention, and intelligent tools for last-mile Africa.

Potential collaboration areas

- Community health and wellness programmes
- Preventive healthcare and health promotion
- Mental health and holistic wellbeing initiatives
- Artificial intelligence for social impact
- Digital health innovation and research exchange
- Global advocacy and storytelling
- Impact investment and philanthropic introductions
- Social enterprise growth and ecosystem mentorship

What FairBanks brings

- An operational community facility as a live innovation and implementation hub
- A scalable Community Reach model rooted in local needs
- FCHIP - a working MVP moving into structured validation and scale
- Experienced healthcare leadership and trusted community relationships
- A commitment to measurable, sustainable, and scalable impact

Our invitation

We would be honoured to explore how the Jay Shetty ecosystem and FairBanks can work together to improve health, wellbeing, and opportunity for underserved communities. As FairBanks validates and scales FCHIP, we seek strategic collaborators who can help accelerate innovation, expand reach, and maximise impact.

Together, we can transform community healthcare into an intelligent, preventive, and compassionate system that empowers every family and every community to thrive.

Next step: a brief 10-minute introductory conversation with your partnerships or impact team.

FairBanks team ready to partner

Subject: Partnership Pitch: FairBanks Community Health x Jay Shetty Ecosystem

Dear Partnerships Team,

I hope this message finds you well.

I am writing on behalf of FairBanks Medical Centre & Pharmacy, a community health social enterprise in Kampala, Uganda. We are building a scalable model that turns compassion and wellbeing into practical primary care, community outreach, and intelligent prevention for underserved families.

The Opportunity

At FairBanks we integrate three pillars: our medical centre and pharmacy, FairBanks Community Reach (outreach, education, prevention, CHIS, and livelihoods), and FCHIP - the FairBanks Community Health Intelligence Platform. FCHIP is our AI-enabled layer that helps communities and care teams see risk earlier and act before crises escalate. We already operate a live clinical and community environment in Kampala peri-urban communities, and we are validating a working FCHIP MVP for the next phase of scale.

Why Jay Shetty?

Jay Shetty has consistently championed wellbeing, compassion, purposeful living, and stronger communities. FairBanks shares that commitment - and converts it into tangible healthcare access, preventive education, and community health intelligence on the ground.

The Partnership

We would welcome a strategic partnership with the Jay Shetty ecosystem in areas such as:

- Community health and wellness initiatives
- Preventive healthcare and mental wellbeing programmes
- AI for social impact and digital health innovation
- Global storytelling and advocacy for equitable healthcare access
- Social enterprise growth support and introductions to aligned impact partners

What We Bring

- An operational community-centred medical facility serving as a real-world innovation hub
- An active Community Reach cascade with CHWs/VHTs, school and community programmes, and livelihood pathways including CHIS
- A working FCHIP MVP ready for structured validation and scale
- Deep local relationships and a leadership team committed to measurable, sustainable impact

I have attached a concise executive partnership brief and deck outlining our vision, model, innovation roadmap, and partnership options.

We would be honoured to schedule a brief 10-minute introductory conversation with your partnerships or impact team to explore how we might work together to improve community health and wellbeing.

Thank you for your time and consideration. We deeply appreciate the meaningful work Jay Shetty and his team continue to do in inspiring positive change around the world.

Warm regards,

Racheal Nabukeera Sekagiri
