

Scaling Community Health Intelligence for Uganda

Statement of Interest: digital health, community systems, and accountable care
Your health, our mission.

FairBanks Community Reach — Health for All — Obulamu eri Bonna · Afya kwa Wote · Oburamu bwa Boona

Item	Detail
Applicant	FairBanks Medical Centre / FairBanks Community Reach — Uganda
Programme	U.S. Dept of State — Uganda Health System MOU (DFOP0017890)
Deadline	31 July 2026 (Statement of Interest, 5:00 PM EDT)
Geography	Uganda (national digital health & community health alignment)
The ask	Invite FairBanks to submit a full application under Objective 4 (digital health) and related community tracks.

Official call

1. Executive Summary

The U.S.–Uganda Health MOU opens up to \$60M across ~15 awards to strengthen Uganda's health system. Objective 4 funds scaling digital health systems including EMRs, DHIS2, eCHIS, iHRIS, and the national data warehouse.

FCHIP is designed as a community intelligence layer that can complement national systems — feeding cleaner CHW data, early warnings, and facility decision support.

A Statement of Interest from FairBanks offers the U.S. and Uganda a private-sector community partner with live operations — not a slide-deck-only vendor.

2. Win-Win Value

FairBanks grows capacity and reach; the programme advances its mission with a grounded African health-tech partner.

2.1 What FairBanks / FCHIP gains

- Pathway to multi-year partnership funding for digital community health
- Alignment with national systems (eCHIS / DHIS2 / data warehouse)
- Capacity to scale beyond Kampala catchments
- Stronger governance, M&E, and compliance muscle

2.2 What the programme / partners gain

- Ugandan implementer with clinic + CHW footprint already in motion
- Contribution to Objective 4 digital health scaling goals
- Community-based complementary data that improves facility and district action
- Potential links to community financing, faith/community facilities, and supply accountability tracks

3. The Problem We Address

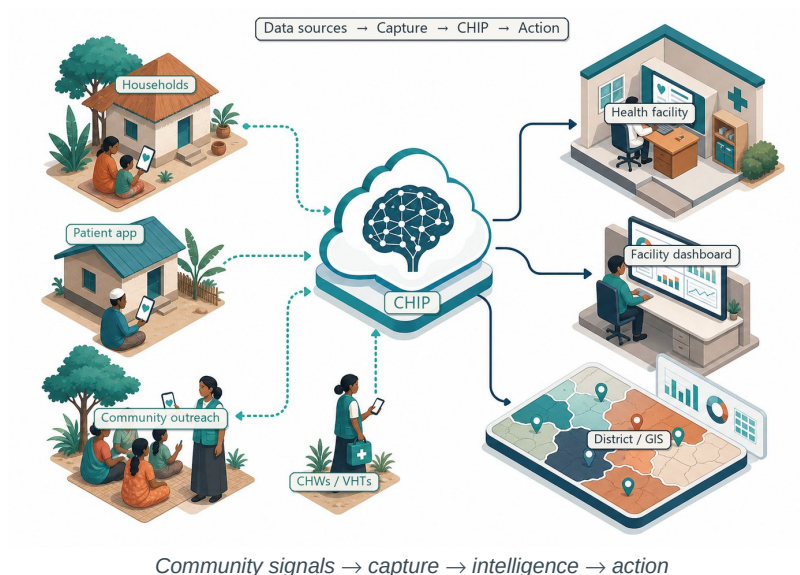

Reactive care waits for sickness before it responds

Uganda's digital health stack is advancing, but community-generated signals still arrive late or incompletely — limiting outbreak response, maternal risk management, and medicine planning.

Scaling digital tools without trusted community partners leaves last-mile gaps.

4. Our Solution: FCHIP & Community Reach

FairBanks proposes FCHIP as a community intelligence complement: mobile CHW capture interoperable with national reporting where permitted, predictive alerts, GIS views, and facility dashboards.

We start from live FairBanks operations, then partner outward with districts and public programmes under MOU priorities.

4.1 Deep technology core

Technology	Role
Artificial Intelligence	Outbreak early warning; maternal and NCD risk scoring
Machine Learning	Learn from community patterns, seasons, and outreach outcomes
GIS Mapping	Disease distribution, hotspots, and resource gaps
Mobile Data Collection	Offline-capable CHW/VHT capture at household level
Cloud Computing	Secure sync across facilities and partners
Analytics Dashboards	Real-time views for clinics, districts, and NGOs

4.2 Priority use cases for this call

eCHIS-aligned capture: Structured community forms that reduce double entry.

Surveillance support: Fever and maternal risk signals for earlier action.

Supply awareness: Demand signals that reduce avoidable stock-outs.

5. Fit to Programme Criteria

Criterion / theme	How we respond
Objective 4 — digital health	EMR/community data, analytics, interoperability intent
Ugandan organisations	Local medical centre and community programmes
Two-step process	This pack supports a strong Statement of Interest
Five-year systems strengthening	Roadmap from pilot catchment to district partnership

6. Why FairBanks Is Ready

Live outreach in Kampala-area communities

- Functioning FairBanks Medical Centre with clinic, pharmacy, and diagnostics
- Active Community Reach outreach in Bukoto, Kyebando, Kisaasi, Kamwokya, Kikaaya
- Trusted CHW and VHT relationships for household visits and referrals
- Live programmes: maternal & child health, Gericare, chronic-disease screening
- Digital health records and outreach data ready to feed FCHIP
- Research and partnership mindset for ethical, evidence-based scale

7. Proposed Plan

Phase / step	Detail
SOI (by 31 Jul 2026)	Submit concise Statement of Interest aligned to Objective 4
Full proposal (if invited)	Technical approach, consortium, budget, M&E, safeguarding
Year 1–2	Pilot interoperability + predictive modules in FairBanks catchment
Year 3–5	District partnerships and national reporting alignment

8. Indicative Resources

Item	Detail	Amount
Digital platform & interoperability	Capture, APIs, analytics, GIS	TBD in full proposal
CHW capacity & supervision	Training, devices, quality assurance	TBD

Item	Detail	Amount
M&E; and learning	Baselines, dashboards, reporting	TBD
Total	Within award band if selected among ~15 awards	Up to programme ceilings

9. Risks & Safeguards

Risk	Mitigation
Data quality in the field	Structured forms, validation, CHW training and supervision
Low digital literacy	Simple offline UX, local-language support, supervised rollout
Privacy and consent	Ethical governance aligned with Uganda data protection rules
Adoption by partners	Co-design with CHWs, clinics, and district users from day one

10. Closing Ask

From community needs to lasting health impact

The MOU succeeds when digital health reaches communities, not only servers. FairBanks is ready to help close that gap.

We request consideration of our Statement of Interest for full application invitation.

Your health, our mission.
