

Gender-Responsive AI for Community Health

*Practical AI skills that put women, girls, and mothers at the centre of FCHIP
Your health, our mission.*

FairBanks Community Reach — Health for All — Obulamu eri Bonna · Afya kwa Wote · Oburamu bwa Boona

Item	Detail
Applicant	FairBanks team member(s) aged 18–30 — Uganda
Programme	Young Feminist AI School 2026 (UN Women)
Deadline	28 July 2026
Geography	Fully online · Uganda participants eligible worldwide
The ask	Admit FairBanks youth / women team members to the 12-week AI School cohort.

Official call

1. Executive Summary

UN Women's Young Feminist AI School builds practical, no-code AI skills for advocacy, policy, and civic tech — with most places reserved for young women and girls.

FairBanks needs exactly this capacity: gender-responsive AI applied to maternal health, adolescent health, and community data that too often ignores women's realities.

Selecting our team strengthens FCHIP's responsible AI practice and gives UN Women a live health use case from Uganda.

2. Win-Win Value

FairBanks grows capacity and reach; the programme advances its mission with a grounded African health-tech partner.

2.1 What FairBanks / FCHIP gains

- Hands-on AI skills for young women on the FairBanks team
- Gender lens for FCHIP features (maternal risk, adolescent SRH, consent)
- A real project deliverable that can plug into community outreach
- Global peer network on feminist and responsible AI

2.2 What the programme / partners gain

- Participants who will apply skills immediately in community health
- A Uganda case study linking AI for gender equality to primary care
- Amplification through FairBanks Community Reach programmes
- Contribution to the 70%+ young women participation goal with serious applicants

3. The Problem We Address

Reactive care waits for sickness before it responds

AI tools in health can deepen inequality if they ignore how women and girls experience care, consent, and unpaid caregiving.

Young changemakers need practical skills — not theory alone — to build gender-responsive systems.

4. Our Solution: FCHIP & Community Reach

We will use the School's project track to design a gender-responsive AI workflow for FairBanks: safer maternal risk flags, clearer consent language, and community feedback loops.

Skills return to CHW training and FCHIP product decisions, not a one-off certificate.

4.1 Deep technology core

Technology	Role
Artificial Intelligence	Outbreak early warning; maternal and NCD risk scoring
Machine Learning	Learn from community patterns, seasons, and outreach outcomes
GIS Mapping	Disease distribution, hotspots, and resource gaps
Mobile Data Collection	Offline-capable CHW/VHT capture at household level
Cloud Computing	Secure sync across facilities and partners
Analytics Dashboards	Real-time views for clinics, districts, and NGOs

4.2 Priority use cases for this call

Maternal alerts: Risk scores explained in plain language for CHWs and mothers.

Adolescent health: Privacy-aware pathways for youth SRH education and referral.

Data dignity: Consent and feedback designed with women users, not about them.

5. Fit to Programme Criteria

Criterion / theme	How we respond
Ages 18–30 worldwide	Ugandan team members in range; women prioritised
No-code practical AI	We will ship a usable project for community health
Advocacy / civic / responsible AI	Health equity and gender-responsive product design
~4 hours weekly	Team can commit alongside FairBanks outreach duties

6. Why FairBanks Is Ready

Live outreach in Kampala-area communities

- Functioning FairBanks Medical Centre with clinic, pharmacy, and diagnostics
- Active Community Reach outreach in Bukoto, Kyebando, Kisaasi, Kamwokya, Kikaaya
- Trusted CHW and VHT relationships for household visits and referrals
- Live programmes: maternal & child health, Gericare, chronic-disease screening
- Digital health records and outreach data ready to feed FCHIP
- Research and partnership mindset for ethical, evidence-based scale

7. Proposed Plan

- Complete all 12 weeks (Aug–Oct 2026) with full attendance
- Build a gender-responsive AI project tied to maternal / adolescent use cases
- Present findings to FairBanks clinical and CHW leads for adoption
- Share learnings back with UN Women alumni channels where useful

8. Risks & Safeguards

Risk	Mitigation
Data quality in the field	Structured forms, validation, CHW training and supervision
Low digital literacy	Simple offline UX, local-language support, supervised rollout
Privacy and consent	Ethical governance aligned with Uganda data protection rules
Adoption by partners	Co-design with CHWs, clinics, and district users from day one

9. Closing Ask

From community needs to lasting health impact

This School turns AI skill into justice. FairBanks will turn those skills into safer care for women and girls in our communities.

We respectfully request places for our eligible young women team members.

Your health, our mission.
