

District Health Intelligence for Government Partners

Watching for health / Africa challenges — ready proof-of-concept partner
Your health, our mission.

FairBanks Community Reach — Health for All — Obulamu eri Bonna · Afya kwa Wote · Oburamu bwa Boona

Item	Detail
Applicant	FairBanks / FCHIP — technology company & health operator, Uganda
Programme	World Bank GovTech Innovation Challenge 2026
Deadline	Varies by challenge — monitor specific challenge pages
Geography	Global challenge platform · Uganda / Africa health use cases
The ask	Shortlist FairBanks when health or Africa digital-government challenges open; engage on relevant PoCs.

[Official call](#)

1. Executive Summary

The World Bank GovTech Innovation Challenge connects technology companies with government digitalisation needs — offering capacity building, a Switzerland bootcamp, and proof-of-concept work with government partners.

Current open challenges may focus elsewhere (e.g. public-finance audit), but FairBanks maintains a ready response pack for health and Africa-aligned calls.

When a matching challenge appears, we can move fast with a district health intelligence PoC concept rooted in live operations.

2. Win-Win Value

FairBanks grows capacity and reach; the programme advances its mission with a grounded African health-tech partner.

2.1 What FairBanks / FCHIP gains

- Access to government PoC pathways and Trust Valley capacity building
- Credibility from World Bank / SECO ecosystem visibility
- Learning that hardens FCHIP for public-sector deployment
- Potential Switzerland bootcamp for selected innovators

2.2 What the programme / partners gain

- A vendor that already runs clinic and community operations — not only software
- Health intelligence use cases governments actually need (surveillance, CHW data, dashboards)
- African implementer ready for public-sector co-design
- Reusable PoC patterns for district health offices

3. The Problem We Address

Reactive care waits for sickness before it responds

Governments struggle to turn scattered community health data into timely decisions. Vendors without field roots deliver brittle pilots.

4. Our Solution: FCHIP & Community Reach

FCHIP offers a GovTech-ready pattern: secure community capture, analytics, GIS, and role-based dashboards co-designed with district users.

We monitor challenge pages and submit only when the use case matches — protecting evaluator time and our own.

4.1 Deep technology core

Technology	Role
Artificial Intelligence	Outbreak early warning; maternal and NCD risk scoring
Machine Learning	Learn from community patterns, seasons, and outreach outcomes
GIS Mapping	Disease distribution, hotspots, and resource gaps
Mobile Data Collection	Offline-capable CHW/VHT capture at household level
Cloud Computing	Secure sync across facilities and partners
Analytics Dashboards	Real-time views for clinics, districts, and NGOs

4.2 Priority use cases for this call

District dashboard: Population risk and coverage views for managers.

CHW data quality: Validation that improves government reporting.

Early warning: Configurable alerts aligned to local protocols.

5. Fit to Programme Criteria

Criterion / theme	How we respond
Tech companies worldwide	Ugandan HealthTech operator eligible
Government digitalisation	District health intelligence PoC ready
Capacity building + bootcamp	Team prepared to attend if selected
Challenge-specific deadlines	Active monitoring; no blind submissions

6. Why FairBanks Is Ready

Live outreach in Kampala-area communities

- Functioning FairBanks Medical Centre with clinic, pharmacy, and diagnostics
- Active Community Reach outreach in Bukoto, Kyebando, Kisaasi, Kamwokya, Kikaaya
- Trusted CHW and VHT relationships for household visits and referrals
- Live programmes: maternal & child health, Gericare, chronic-disease screening
- Digital health records and outreach data ready to feed FCHIP
- Research and partnership mindset for ethical, evidence-based scale

7. Proposed Plan

- Maintain this application pack as a ready response baseline
- Monitor World Bank GovTech challenge pages weekly
- Submit tailored proposals only for health / Africa-aligned challenges
- If selected: co-design PoC with government partner and measure decision-cycle gains

8. Risks & Safeguards

Risk	Mitigation
Data quality in the field	Structured forms, validation, CHW training and supervision
Low digital literacy	Simple offline UX, local-language support, supervised rollout
Privacy and consent	Ethical governance aligned with Uganda data protection rules
Adoption by partners	Co-design with CHWs, clinics, and district users from day one

9. Closing Ask

From community needs to lasting health impact

GovTech works when government problems meet operators who already serve people. FairBanks is ready when the right challenge opens.

We ask to be considered for matching health and Africa digital-government challenges as they appear.

Your health, our mission.
