

Health–Livelihood Intelligence for Rural Policy

Linking community health data to rural development performance
Your health, our mission.

FairBanks Community Reach — Health for All — Obulamu eri Bonna · Afya kwa Wote · Oburamu bwa Boona

Item	Detail
Applicant	FairBanks (with research / policy partners as required) — Uganda
Programme	IFAD Grant — Rural Sector Performance Assessment (up to US\$1.2M)
Deadline	4 September 2026 (12:00 CET); optional EOI 31 July 2026
Geography	Uganda rural / peri-urban catchments · policy learning global
The ask	Consider FairBanks (and partners) for EOI and full proposal on health–livelihood policy intelligence.

[Official call](#)

1. Executive Summary

IFAD seeks proposals up to US\$1.2M to leverage the Rural Sector Performance Assessment for better policy and investment — open to non-profits, private firms, universities, and think tanks.

FairBanks' cascade already links health to livelihoods and resilient families. FCHIP can contribute community health and vulnerability signals that make rural performance assessment more human-centred.

This pack frames a careful, partnership-ready fit — to be confirmed against IFAD's detailed thematic guidance before full proposal effort.

2. Win-Win Value

FairBanks grows capacity and reach; the programme advances its mission with a grounded African health-tech partner.

2.1 What FairBanks / FCHIP gains

- Resources to connect health intelligence with rural livelihood policy
- Partnerships with universities / think tanks on rigorous assessment
- Evidence that prevention protects income and food security
- Optional EOI path to test fit early (31 July 2026)

2.2 What the programme / partners gain

- Ground-level health and vulnerability data from community programmes
- Private-sector / social enterprise implementer with field access
- SDG-aligned story: health shocks as rural poverty drivers
- Counterpart contribution potential via FairBanks operations (20–25%)

3. The Problem We Address

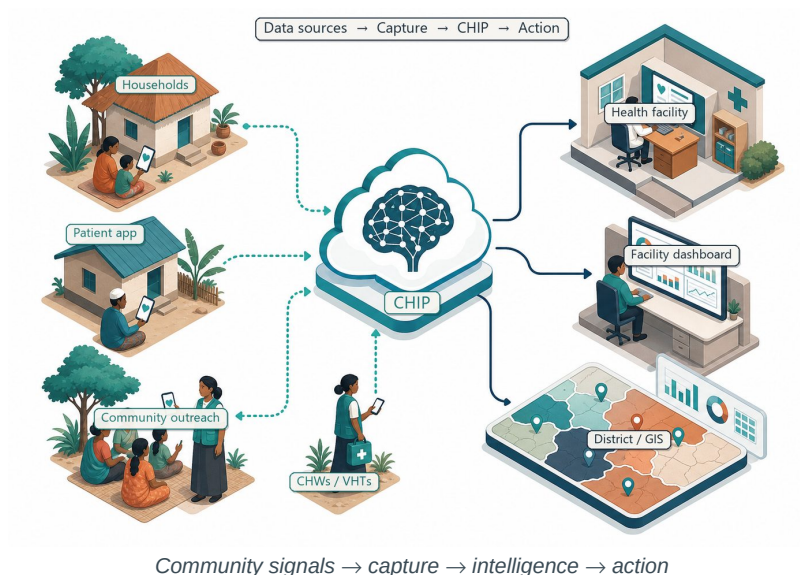

Reactive care waits for sickness before it responds

Rural policy often tracks production and infrastructure while under-weighting health shocks that wipe out household gains.

Without community health intelligence, rural performance assessments miss a core driver of poverty.

4. Our Solution: FCHIP & Community Reach

Propose a workstream where FCHIP community indicators (illness clusters, maternal risk, missed care) inform rural performance dashboards and policy briefs, in partnership with research institutes.

Counterpart effort includes FairBanks field operations, CHW networks, and data stewardship.

4.1 Deep technology core

Technology	Role
Artificial Intelligence	Outbreak early warning; maternal and NCD risk scoring
Machine Learning	Learn from community patterns, seasons, and outreach outcomes
GIS Mapping	Disease distribution, hotspots, and resource gaps
Mobile Data Collection	Offline-capable CHW/VHT capture at household level
Cloud Computing	Secure sync across facilities and partners
Analytics Dashboards	Real-time views for clinics, districts, and NGOs

4.2 Priority use cases for this call

Health-shock markers: Link disease surges to livelihood stress signals.

Policy briefs: Translate community data into investment priorities.

Partner research: Co-design methods with academic / think-tank partners.

5. Fit to Programme Criteria

Criterion / theme	How we respond
Rural Sector Performance Assessment	Add health–livelihood intelligence layer
Eligible entity types	Social enterprise + research partners
Counterpart 20–25%	In-kind operations and staff time
Verify thematic match	EOI first; full proposal only if guidance confirms fit

6. Why FairBanks Is Ready

Live outreach in Kampala-area communities

- Functioning FairBanks Medical Centre with clinic, pharmacy, and diagnostics
- Active Community Reach outreach in Bukoto, Kyebando, Kisaasi, Kamwokya, Kikaaya
- Trusted CHW and VHT relationships for household visits and referrals
- Live programmes: maternal & child health, Gericare, chronic-disease screening
- Digital health records and outreach data ready to feed FCHIP
- Research and partnership mindset for ethical, evidence-based scale

7. Proposed Plan

Phase / step	Detail
By 31 Jul 2026	Optional non-binding Expression of Interest
By 4 Sep 2026	Full proposal if thematic fit confirmed
Year 1–2	Pilot indicators in FairBanks / partner rural catchments
Learning	Policy notes for IFAD and national stakeholders

8. Indicative Resources

Item	Detail	Amount
Research & assessment design	Methods, partners, ethics	Share of grant

Item	Detail	Amount
Community data & FCHIP modules	Indicators, dashboards, quality	Share of grant
FairBanks counterpart	Field ops, staff, outreach	20–25% in-kind
Ceiling	Per call	Up to US\$1.2M

9. Risks & Safeguards

Risk	Mitigation
Data quality in the field	Structured forms, validation, CHW training and supervision
Low digital literacy	Simple offline UX, local-language support, supervised rollout
Privacy and consent	Ethical governance aligned with Uganda data protection rules
Adoption by partners	Co-design with CHWs, clinics, and district users from day one

10. Closing Ask

From community needs to lasting health impact

Rural development succeeds when families stay healthy enough to work and thrive. FairBanks can help IFAD see that link clearly.

We will submit an EOI and proceed to full proposal only where official guidance confirms thematic fit.

Your health, our mission.
