

KEY PROJECT PERSONNEL CV TEMPLATE

FairBanks Community Health Reach | WA Foundation Category 2

*Annex 6 – Complete one template for each named key project
team member*

Completion instruction: Provide accurate, current and verifiable information. Do not include qualifications, employment history, achievements or professional registrations that cannot be supported by evidence.

1. Personal & Professional Information

Full Name	Wasswa Wilson
Current Job Title	Lead Software Developer (FCHIP and Health Information Systems)
Organisation / Department	FairBanks Medical Centre Limited, FCHIP / Health Information Systems
Proposed Project Role	M&E / Data Lead (Monitoring, Evaluation and Data Lead)
Telephone	+256 783 230 321
Email	wasswawilson0001@gmail.com
Professional Registration / Licence	N/A. The proposed role is non-clinical and has no statutory registration requirement. My BSc Biomedical Engineering certificate from Makerere University is available as evidence.

2. Professional Profile

Write a concise 100–150 word profile highlighting current role, years of relevant experience, technical strengths and relevance to the FairBanks Community Health Reach project.

I am a biomedical engineer and software developer with more than seven years of work in hospital technology and health data systems in Uganda and neighbouring countries. At FairBanks Medical Centre Limited I lead development of the FairBanks Community Health Information Platform (FCHIP), an ongoing build covering the data capture forms, the database behind them, the cloud data flows and the reporting dashboards for management. Before joining FairBanks I led the Gould Family Foundation biomedical team across East and Central Africa and managed the biomedical function at International Hospital Kampala. That work involved facility upgrades, equipment registers, maintenance schedules, procurement records, management reports and the evidence files kept for COHSASA accreditation. For FairBanks Community Health Reach I am proposed as Monitoring, Evaluation and Data Lead, working on indicators, data quality, analysis, dashboards and reporting.

3. Academic Qualifications

Qualification	Field / Specialisation	Institution	Year	Evidence Available
BSc Biomedical Engineering	Biomedical Engineering (Second Upper Honours)	Makerere University	2012–2017	Yes
Certificate in Leadership and Management in Health	Health leadership and management (A+)	University of Washington	2022	Yes
Uganda Advanced Certificate of Education (UACE)	Mathematics, Physics, Biology, Chemistry	Mengo Secondary School	2011	Yes
Uganda Certificate of Education (UCE)	O-Level (general)	St. John's Wakiso Secondary School	2009	Yes

4. Professional Training, Certification & CPD

Course / Certification	Provider	Year	Relevance to Project	Evidence
Leadership and Management in Health	University of Washington	2022	Planning, leadership and management of health programmes, which supports the coordination, reporting and review duties in the M&E role.	Attached
Java Programming Level 1	Greenbridge School of Open Technologies	2015–2016	Programming foundation for the database, dashboard and data tool work used to build and maintain FCHIP.	Attached
COHSASA accreditation standards: in-service preparation and compliance	International Hospital Kampala	2020–2024	Standards-based documentation, evidence files and quality review, which is the same discipline needed for data quality assurance and verification.	Attached
Fire Safety, Prevention, Firefighting and Emergency Scene Management	Fire Technologies Limited (IHK)	2021	Workplace safety and incident procedure awareness for facility-based and field project activities.	Attached

5. Employment & Professional Experience

List the most relevant positions first. Focus on responsibilities and achievements relevant to the proposed project role.

Employer / Programme	Position	Start	End	Key Responsibilities	Relevant Achievement
FairBanks Medical Centre Limited	Lead Software Developer (FCHIP and Health Information Systems)	2026	Present	Lead the design and build of the FairBanks Community Health Information Platform (FCHIP) and the related clinic and community digital tools. This covers data capture forms, database structure, cloud data flows and reporting dashboards, together with technical documentation and data security practice. I also support partnership meetings and proposal development.	Leading development of FCHIP, the platform proposed to hold FCHR community, screening, referral and follow-up records. The build is ongoing.
Independent biomedical engineering practice (private contracts)	Consultant Biomedical Engineer	Mar 2025	Present	Install, commission, calibrate and maintain hospital equipment under contract in Uganda, DR Congo, Kenya, Tanzania and Somaliland. Train the clinical users and produce a service report and maintenance record for every assignment.	Completed laboratory, theatre and radiology installations in DR Congo, including the hospital serving Kibali Gold Mine, with documented handover to users.

Employer / Programme	Position	Start	End	Key Responsibilities	Relevant Achievement
Gould Family Foundation (GFF)	Biomedical Programs Manager	Aug 2024	Feb 2025	Managed the biomedical team across East and Central Africa, covering programme planning and implementation. Led biomedical and clinical user training programmes, developed equipment lifecycle management strategies, and oversaw procurement, installation and commissioning of medical technologies, with programme documentation kept in line with healthcare technology standards.	Upgraded several facilities, including the neonatal intensive care unit at Mama Lucy Kibaki Hospital in Nairobi. Produced equipment master-planning and lifecycle strategies applied across partner facilities.
International Hospital Kampala (IHK)	Biomedical Manager	Jan 2020	Jan 2024	Managed biomedical engineering operations for a large private hospital. Led installation and commissioning of CT, X-ray, oxygen plant, laboratory, theatre and ICU systems, set up preventive maintenance schedules and service-record systems, coordinated procurement and equipment lifecycle management, and maintained accreditation documentation.	Supported the hospital through successful COHSASA accreditation and improved equipment uptime with a documented preventive maintenance programme.
Norvik Hospital Ltd	Biomedical Engineer	Apr 2019	Jan 2020	Maintained and serviced hospital diagnostic and patient-monitoring equipment, supported installation and calibration of imaging and ICU equipment, and helped put preventive maintenance systems in place.	Helped establish preventive maintenance schedules and service follow-up records for diagnostic equipment.
Uganda Virus Research Institute (UVRI)	Research Intern	Dec 2018	Apr 2019	Took part in biomedical research projects and assisted with laboratory data analysis, experimentation and recording of results.	Gained practical experience in research data handling, analysis and documentation.
Makerere University, College of Health Sciences	Teaching Assistant	Mar 2016	Aug 2017	Assisted in teaching biomedical engineering courses and supported laboratory practical sessions for engineering students.	Experience in structured instruction and practical supervision, useful for VHT and CHW orientation on data tools.

6. Experience Directly Relevant to FCHR

Summarise the person's experience in the areas most relevant to the project:

Community health / outreach:

Most of my work has been on the information side of outreach rather than on delivering it. I am designing the FCHIP data capture tools that will record community engagement, health education sessions, screening, referral and follow-up, so that what the teams

do in the field can be counted, checked and reported. At IHK, Gould Family Foundation and FairBanks I have worked alongside the facility and clinical teams who receive community referrals.

Project or programme management:

As Biomedical Programs Manager at Gould Family Foundation, from August 2024 to February 2025, I managed the biomedical team across East and Central Africa, covering programme planning and implementation, procurement, installation, commissioning, and biomedical and user training. That work included upgrading several facilities, among them the neonatal intensive care unit at Mama Lucy Kibaki Hospital in Nairobi. Before that, at International Hospital Kampala from January 2020 to January 2024, I managed the hospital biomedical function: workplans, preventive maintenance schedules, service records and reporting to management. At FairBanks I now lead FCHIP delivery, including scope, workplan and technical documentation.

Clinical services / referral / continuity of care:

My background is not clinical. What I have done is keep the systems that clinical services rely on running. At IHK I led the installation, commissioning and maintenance of the CT, X-ray, laboratory, theatre and ICU equipment used in diagnosis and treatment, and I kept the documentation needed for COHSASA accreditation. FCHIP is now being built to capture referrals, link appointments and track follow-up, so that a case identified in the community can be traced through to completed care.

Monitoring, evaluation, data or digital systems:

This is where most of my contribution to FCHR will sit. I lead development of the FairBanks Community Health Information Platform (FCHIP), which is still being built: data capture form design, database structure, cloud data flows, reporting dashboards and web and mobile delivery. Earlier, at IHK and Gould Family Foundation, I built and maintained equipment registers, preventive maintenance schedules, service records and routine management reports, and I prepared the evidence files reviewed for COHSASA accreditation, which is data quality assurance against a defined standard. I have also built other health data systems, including endoscopy image capture and reporting software for St. Catherine and St. Francis hospitals, and the Wekebere foetal heart-rate monitoring application with cloud storage. For data handling, analysis and reporting I work in Python, Java, JavaScript and TypeScript, SQL and MATLAB.

Finance, administration or procurement:

At IHK, between January 2020 and January 2024, I coordinated procurement and lifecycle management of hospital medical equipment, including specifications, supplier coordination, commissioning documents and asset records. At Gould Family Foundation I oversaw procurement, installation and commissioning of medical technologies for partner facilities and kept the programme documentation. I have never held a dedicated finance post, so my experience here is procurement paperwork, asset records and technical and administrative reporting rather than budget control.

Stakeholder engagement / partnerships:

On 28 July 2026 I hosted and chaired the FairBanks meeting with the Uganda Health Partners Cooperative (UHPC) on cooperative health insurance, and I wrote up the discussion and the follow-up actions. That work connects directly to the sustainability and community financing stage of FCHR. I have also trained biomedical engineers and technicians at Gould Family Foundation and IHK, and worked regularly with hospital departments, suppliers and accreditation assessors. I prepare partnership, proposal and grant documents for FairBanks.

7. Key Projects / Assignments

Project / Programme	Role	Organisation	Period	Key Contribution / Result
FairBanks Community Health Information Platform (FCHIP)	Lead Software Developer	FairBanks Medical Centre Limited	2026 to present	Leads the platform design and build, currently in development: community, screening, referral and follow-up data capture, database structure, dashboards and web and mobile delivery. Proposed to hold FCHR project data.

Project / Programme	Role	Organisation	Period	Key Contribution / Result
Regional facility upgrade and biomedical training programme	Biomedical Programs Manager	Gould Family Foundation (East and Central Africa)	2024–2025	Managed the biomedical team across the region. Upgraded several facilities, including the neonatal intensive care unit at Mama Lucy Kibaki Hospital in Nairobi, and led biomedical and clinical user training.
COHSASA hospital accreditation programme	Biomedical Manager	International Hospital Kampala	2020–2024	Kept equipment, maintenance and compliance evidence to accreditation standards and supported the hospital through successful accreditation.
Hospital equipment installation and commissioning programme (CT, X-ray, oxygen plant, laboratory, ICU)	Biomedical Manager	International Hospital Kampala	2020–2024	Led installation, commissioning and handover to clinical users, with preventive maintenance and service documentation that cut equipment downtime.
Endoscopy image capture and reporting software	Lead Developer	St. Catherine Hospital and St. Francis Hospital	2017–2019	Developed clinical image capture and procedure reporting software in JavaFX and MySQL, used to document endoscopy procedures.
Shulekeeper information system	Assistant Software Developer	Shulekeeper	2021–2024	Contributed to a multi-user records and reporting system built with React and Next.js, TypeScript, Laravel, MySQL and AWS.
Wekebere foetal heart-rate monitoring system	Developer	Wekebere	2017–2024	Built an Android and Arduino monitoring application with Azure cloud storage, moving device readings to the cloud for review.

8. Technical & Professional Competencies

Competency	Level / Years	Evidence / Example
Project planning & coordination	Strong (6+ years)	Managed the Gould Family Foundation biomedical team across East and Central Africa in 2024 and 2025, and the IHK biomedical function from 2020 to 2024: workplans, schedules, procurement coordination and management reporting.
Community mobilisation & engagement	Supporting role	Not a field mobiliser. My part is building the FCHIP tools that will record community engagement, education sessions, screening and referral so the activity can be verified and reported.
Clinical quality / referral management	Technical support role	Maintained the diagnostic, laboratory, theatre and ICU equipment behind clinical quality at IHK, prepared COHSASA evidence files, and am building referral and follow-up tracking into FCHIP.
Monitoring & evaluation / data	Strong (7+ years)	Leads the FCHIP data capture, database, dashboard and reporting build, now in progress. Built equipment registers, maintenance schedules and routine management reports at IHK and Gould Family Foundation. Analysis in Python, SQL, Java, JavaScript and MATLAB.
Financial management / administration	Supporting role	Procurement paperwork, asset registers, service records and administrative reporting at IHK and Gould Family Foundation. No dedicated finance post held.

Competency	Level / Years	Evidence / Example
Procurement / compliance	Strong (5+ years)	Coordinated procurement, specification, commissioning and lifecycle documentation at IHK and Gould Family Foundation, and kept the compliance evidence for COHSASA accreditation.
Stakeholder / partnership management	Working to strong	Hosted the FairBanks and UHPC meeting on cooperative health insurance on 28 July 2026. Works with hospital departments, suppliers, trainees and accreditation assessors, and prepares partnership and grant documents.
Reporting & documentation	Strong (7+ years)	Service reports, maintenance logs, accreditation evidence files, technical documentation, meeting minutes and grant documents at IHK, Gould Family Foundation, in private contracts and at FairBanks.

9. Languages & Community Communication

Language	Proficiency	Use in Project
English	Fluent (professional working proficiency)	Reporting, documentation, donor and partner communication, training and data analysis.
Luganda	Native speaker	Community engagement, VHT and CHW orientation, and support to community-level data collection in Kampala.

10. References

Provide two professional referees who can verify the candidate's experience and suitability for the proposed project role.

Name	Position / Organisation	Relationship	Telephone / Email	Permission to Contact
Eng. Richard Ssejongo	Biomedical Engineer, St. Francis Hospital Nsambya	Professional colleague in biomedical engineering practice	+256 753 818 754 / +256 777 132 489	Yes
Dr. Annet Khingi	Senior Radiologist and Administrator, Mengo Hospital	Professional referee, hospital clinical and administrative leadership	+256 772 592 771 / +256 701 592 771	Yes

11. Supporting Documents Checklist

- ☒ Current CV attached.
- ☒ Academic qualification evidence available.
- ☒ Professional certificate(s) / licence(s) attached where applicable.
- ☒ Professional registration evidence checked where applicable.
- ☒ Employment / role history can be verified.
- ☒ Project role and responsibilities are consistent with Annex 6 and the Full Proposal.

12. Declaration

I confirm that the information provided in this CV template is accurate and complete to the best of my knowledge. I authorise FairBanks Medical Centre Limited to use this information for project planning, donor review and verification in connection with the Within Africa Foundation Category 2 application.

Name: Wasswa Wilson
