

CURRICULUM VITAE FOR WASSWA WILSON

Bio Data

First Name: WASSWA

Second Name: WILSON

Date of birth: 17th/October/1991

Nationality: Ugandan

Sex: Male

Languages:

English – Fluent

Luganda – Fluent (Native)

Contacts

Phone: +256753113200/+256783230321

Email: wilgrace2624@gmail.com

Current Residence: Makerere Kavule, Bombo Road.

Personal statement

I am very flexible teachable and quick to learn with profound leadership skills. I love teamwork and I can easily learn new things in the shortest time possible under personal or minimum guidance. In addition, I can easily blend and associate with people of various character.

Education background

Duration	Institution	Award	Score
Sept-2022	University of Washington	Certificate in Leadership and Management in health	A+
2012–2017	Makerere University	BSc. Biomedical Engineering	Second Upper Honors degree
Dec/2018-Apr/2019	Uganda Virus Research Institute	Biomedical Intern	Internship/Research
2016 - 2016	Green Bridge School of Open Technology	Advanced <i>Java</i> Programming	A+

2010 – 2011	Mengo Secondary School	Uganda Advanced Certificate of Examination	Result 5
2006 - 2009	St John's Wakiso Secondary School	Uganda Certificate of Examination	Division 1

Work Experience (5 years)

Duration	Organisation	Position
Jan-2020 to Jan-2024	International hospital Kampala	Biomedical Manager
Apr-2019 to Jan-2020	Norvik Hospital Ltd	Biomedical Engineer
Dec-2018 to Apr-2019	Uganda Virus Research Institute	Internship/Research
Mar-2016 to Aug-2017	Makerere University – College of Health Sciences	Teaching Assistant

Tasks at my former job (C-Care IHK)

- Managing and supervising all Biomedical activities of the hospital.
- Follow up with the day-to-day service calls and share with the team members to ensure that tasks are well addressed.
- Follow up with all the pending requisitions from the team and the equipment users. Liaise with the procurement department to ensure time delivery of all requisitions.
- Update the equipment maintenance register for all equipment.
- Keeping track of the equipment spare parts in stock.
- Notifying user departmental managers regarding status of repairs and works of equipment within their department.
- Ensure that the day-to-day operations continues running efficiently even when off duty by being available on call 24/7 but physically available in case needed.
- Compile and share a weekly & monthly report.
- Ensure that the team adherence to minimum working hours as per company policy, hence draft and share a department's Rota running a 24hrs coverage service.
- Organize a monthly Quality Improvement Plan and ensure that the set target dates are adhered too.
- Plan an annual medical equipment maintenance plan.
- Review and update the equipment inventory per department.
- Updating the department risk register and share with SHEQ & QA officer.

- Updating the Council for Health Services Accreditation of Southern Africa (COSHASA) file and ensuring that the hospital continues to adhere to the standards.
- Secretary for equipment management and advisory committee - ensures that the monthly meeting is organized and complied to by the committee members.
- Participate in the formulation and implementation of induction/orientation.
- Adhere to the COHSASA hospital standards in relation to medical equipment management.
- Oversee the adherence to all equipment approved annual maintenance contract (AMC) and Comprehensive Maintenance contracts (CMC).

Major Achievements at my Former work place.

While in the above workplaces, I have achieved the following:

- Hospital accreditation by Council for Health Services Accreditation of Southern Africa (COSHASA)
- I assessed the old maternity wing, outlined loopholes and developed the Biomedical master plan and budget which was adopted for the new maternity.
- Providing specifications, budgeting and supervising the installation and commission of the new CT machine, Oxygen plant, CT, new Digital X-Ray machine.
- I developed equipment management documents based on standard operating procedures and by consulting from other experienced Biomedical Engineers and clinical personnel.
- I have accumulated a great deal of leadership experience. I can work and interface with people of all social backgrounds.
- I have managed to assess and improve departmental facilities. I managed to set up the Covid19 treatment unit at international hospital Kampala and develop most of the SOPs for managing COVID-19 patients in the unit. I also identified the equipment used to manage covid-19 patients these include Ventilators, Opti-flow machine, oxygen cylinders and manifolds among others. This was not only achieved it at IHK but also other hospitals consulted me during the pandemic period.
- While working with the rest of the team, I have played a big role in the restructuring and designing of patient flow in the maternity department.
- I have successfully managed to implement procedure for managing medical gas plants such as: Oxygen, Medical air, and the central vacuum plants and AGSS system.
- I have mastered and implemented several hospital guidelines as stipulated by the Council for Health Service Accreditation of South Africa (COHSASA).
- Efficiently managed procurement procedure, budgeting, backorder management, internal and external audit, history files and QC files.

- I successfully made 2 financial year budgets for the equipment purchases, spare parts and consumables, and service contracts. I also advise regarding cost of consumables that are used on equipment.
- I trained other Biomedical Engineers. These were fresh graduates from Higher institution who are now experienced Biomedical Engineers.
- I developed equipment service schedules for external service providers and those that are serviced internally.

Medical equipment experience and Exposure:

- Maternity Unit:** Foetal dopplers, Ultrasound equipment, CTG machines, colposcopes, delivery beds, etc.
- Medical gas generators: Oxygen plants, Medical Air plant, Vacuum suction equipment, etc**
- NICU:** Neonatal incubators, phototherapy equipment, neonatal resuscitators, warmers, neonatal CPAP machines.
- Lab equipment:** such as haematology analysers, chemistry, Immunology analysers, Coagulation machines, blood banks, RO plants, etc
- Theatre equipment:** such as GE Anaesthesia machines (Model: 9100C), Endoscopy tower (Stryker 1288), theatre lamps, suction pumps and oxygen concentrators, Electrical surgical Units (BOWA ARC250, BOWA ARC350), Laparoscopy equipment, etc.
- Neuro-equipment:** such as EMG machines and EEG machines, ICP monitors, Neuro-surgical equipment.
- Imaging Equipment:** such as X-Ray and Ultrasound (Phillips Envisor C, Siemens ACUSON, GE Varsana & Logiq series, Alpinion, etc), CT, C-Arms.
- ICU equipment:** such as Patient monitors, GE Carescape R680, Incubators, Infusion pumps (Fresenius and B.Braun), Dialysis Machines (Baxter and Fresenius 4008S), Dragger Infinity Ventilator, Savina V300 ventilator, Fleximag Ventilator, Fisher & Paykel humidifiers & Opti-flow machines, etc.

Extra skills

1. Bioinformatics, computational biology and functional genomics.
2. Excellent knowledge of Microsoft office programs.
3. Java, Android, C, C++, C#, HTML, PYTHON, MATLAB programming.
4. Scientific research, project planning and management.
5. Embedded systems designing.

6. Computer aided designing using Solid edge, Proteus & Eagle. 7. Job card preparation and report writing
8. Good marketing skills.

REFERENCE

- a. Dr. Annet Khingi (Senior Radiologist and Administrator, Mengo Hospital)
